# **2025 TRAININGS**

## **ADVANCED TRAINING COURSES**

These trainings, carried out by the world's best experts in the fields concerned, are intended for people working in a specific field. Their purpose is to take stock of scientific knowledge as of the date. They are given in English.

## **ON DEMAND TRAININGS**

These are training courses which have been included in our catalog and which could be given for any company on demand.

## **EVALUATIONS**

All evaluations carried out by participants at the end of the training courses can be found on our website [www.cdp-innovation.com](http://www.cdp-innovation.com)

# **PRACTICAL ASPECTS**

## **DISABILITY**

In order to help people with disabilities during training, CDP-Innovation has joined the Agephip Disability Referent Network. If you have any questions regarding this topic, please contact:

jeanmarc.paris@cdp-innovation.com

## **APPROVAL**

CDP-Innovation is a training organization approved by the Rhône prefecture (France)

## **CERTIFICATION QUALIOPi**

CDP-Innovation is a Qualiopi certified organization (Certification 1022 OF Ind 2).

Qualiopi is a French certification which ensures a high quality of trainings.

See the certificate issued by Qualianor on the website of CDP-Innovation

## **CONDUCT OF TRAINING**

No training is canceled due to an insufficient number of participants.

All CDP-Innovation training can be carried out intra-company

## **MULTIPLE REGISTRATIONS**

For 3 training registrations, CDP offers the third registration

# **ADVANCED TRAINING COURSES**

# DIFFERENTIAL SCANNING CALORIMETRY (DSC)

***Innovation***

Training presented in partnership with

**Date: 1 and 2 October 2025 (registration limit: 15 September)**

**Venue: Paris. Site accessible to people with disabilities**

**Attendees: Doctors, Research or Development people, Technicians**

**Price: 1900 € HT**

**Language: English**

**Duration: 12 hours**

**Speaker: Dr Pierric Marchand (Holodiag)**

**Limited number of participants: 20 per session.**

**Discussed subjects:** The aim of this training is to explain the theory of the DSC (Differential Scanning Calorimetry), to explain the methods of measurement and to interpret the signals obtained. The last part will be devoted to examples.

**Teaching aids:** Presentation by the speaker using a video projector and delivery of paper support to each participant.

**Assessment of acquired knowledge:** No control planned. Only an evaluation of the training is planned.

**Information from [formation@cdp-innovation.com](mailto:formation@cdp-innovation.com)**

# FLOW CHEMISTRY

Training presented in partnership with

**Date: 3 and 4 June 2025 (registration limit: 16 May)**

**Venue: Toulouse. Site accessible to people with disabilities**

**Attendees: Doctors, Research or Development people, Technicians, Project managers, Manufacturers, ...)**

**Price: 1900 € HT**

**Language: English**

**Duration: 12 hours**

**Speakers : Pr. Sébastien Elgue and Pr. Nathalie Raimondi (Institut National Polytechnique de Toulouse, ENSIACET, Toulouse)**

**Limited number of participants: 20 per session.**

## **Discussed topics:**

The purpose of this training is to enable participants to develop and industrialize processes with the concept of flow Chemistry. This training addresses the fundamentals of continuous intensification, the various existing technologies and equipment as well as examples of industrial applications.

**Teaching aids:** Presentation by speakers using a videoprojector and delivery of paper support to each participant.

**Assessment of acquired knowledge:** No control planned. Only an evaluation of the training is planned.

# INITIATION TO DESIGN OF EXPERIMENT (DOE)

*Innovation*

Training presented in partnership with

**SEQENS**

**Date: 30 June, 1 and 2 July 2025 (registration limit: 15 June)**

**Venue: Lyon. Site accessible to people with disabilities**

**Attendees: Doctors, Research or Development people, Technicians**

**Price: 2850 € HT**

**Language: English**

**Duration: 18 hours**

**Speaker: Sabrina Guillemer (Seqens)**

**Limited number of participants: 20 per session.**

## **Discussed topics:**

The objective of this training is to make experimenters aware of the usefulness of planning and statistical analysis of experimental data to achieve an objective in an efficient and reliable manner.

Introduce to the method of "design of experiments" usable both in research and development and in production.

At the end of the training, the trainees will be able to design, implement and interpret simple experimental plans using the AZURAD® software.

**Teaching aids:** Presentation by the speaker using a videoprojector and delivery of paper support to each participant.

**Assessment of acquired knowledge:** No control planned. Only an evaluation of the training is planned.

# RECENT ADVANCES IN ELECTROSYNTHESIS

Formation présentée en partenariat avec

**Date: 16 and 17 October 2025 (registration limit: 1<sup>st</sup> October)**

**Venue: Nice**

**Public: Doctors, Research or Development people, Technicians, Project managers, Manufacturers, ...)**

**Prix : 1900 € HT**

**Language: English**

**Duration: 12 hours**

**Speaker: Dr Romain Melot (Université de Nice Sophia-Antipolis)**

**Limited number of participants: 20 per session.**

**Discussed subjects:**

Organic electrochemistry has made remarkable advances in recent years. This training will detail recent developments in this field and their applications in organic electrosynthesis.

**Teaching aids:** Presentation by the speaker using a videoprojector and delivery of paper support to each participant.

**Assessment of acquired knowledge:** No control planned. Only an evaluation of the training is planned.

**Information from [formation@cdp-innovation.com](mailto:formation@cdp-innovation.com)**

# SOLID STATE AND CRYSTALLIZATION OF SMALL MOLECULES

*Innovation*

Training presented in partnership with

**Date: 29 and 30 September 2025 (registration limit: 12 September)**

**Venue: Paris. Site accessible to people with disabilities**

**Attendees: Doctors, Research or Development people, Technicians, Project managers, Manufacturers, ...)**

**Price: 1900 € HT**

**Language: English**

**Duration: 12 hours**

**Speaker: Dr Pierric Marchand (Holodiag)**

**Limited number of participants: 20 per session.**

**Discussed subjects:**

This training aims to familiarize the participants with the different forms of solid state (polymorphs, solvates, ...) and to propose methodologies for the development and the realization of a crystallization.

**Teaching aids:** Presentation by the speaker using a videoprojector and delivery of paper support to each participant.

**Assessment of acquired knowledge:** No control planned. Only an evaluation of the training is planned.

# USE OF ENZYMATIC CATALYSIS IN ORGANIC SYNTHESIS

*Innovation*

Formation présentée en partenariat avec

**Date: 3 and 4 November 2025 (registration limit: 15 October)**

**Venue : Paris, Site accessible aux personnes handicapées.**

**Attendees: Doctors, Research or Development people, Technicians, Project managers...)**

**Price: 1900 € HT**

**Langue: English**

**Duration: 12 hours**

**Speakers: Pierre Gilles (Protéus)  
Jean Marc Paris (CDP-Innovation)**

**Limited number of participants: 20 per session.**

**Discussed topics:** Enzymatic catalysis has strengthened the range of synthesis tools for organic chemists. Generally simple to use, enzymes allow reactions to be carried out in mild conditions with great specificity. The training will present the main reactions carried out with enzymes and will show industrial examples of applications in several fields (pharmacy, food, flavors, bio-sourced raw materials, etc.)

**Teaching aids:** Presentation by the speakers using a videoprojector and delivery of a paper medium to each participant

**Assessment of acquired knowledge:** No control planned. Only an evaluation of the training is planned.

**Information from [formation@cdp-innovation.com](mailto:formation@cdp-innovation.com)**

## ON DEMAND TRAININGS

The following training courses will only be possible after 2 registrations have been made for an off-site training or after a quote for an in site-company training.

TITLE	SPEAKERS	TOPIC	PRICE /ATTENDEE	DURATION
<a href="#">Circular Dichroism</a>	M. Mehiri (Université Cote d'Azur)	Principle and use of circular dichroism in the determination of the absolute configuration of an asymmetric molecule	1900 €	12h
<a href="#">Controlled Radical polymerization</a>	D. Gigmes (Université d'Aix-Marseille)	Development of controlled radical polymerization. Preparation of new polymers (Block polymers, comb polymers)	1900 €	12h
